EXPERIENCE

Software Developer & Founding Team (3 years)
Prosperr.io

📅 Oct 2021 – Present | 3 years   📍 Bangalore

Super Saver (B2C)
- Developed Super Saver product a tax management platform from scratch.
- Key features include real-time tax liability tracking, AI-driven tax-saving insights, automated payslip analysis, and professional support through CAs and CSs.
- Enhanced user experience with a chat feature for instant query resolution.

Super Saver CMS (Internal Tool)
- Developed from scratch an internal tool to streamline operations for teams.
- Managed various functionalities including advisor and customer service personnel management, manual payments, articles, payslip manual verification, and advisor timeslots.
- Implemented user activity tracking to enhance operational efficiency and oversight.

Prosperr FBP (B2B)
Worked end to end on development of Prosperr FBP (Flexible Benefits Plan), consisting of three distinct products:
- **Mobile Application:** Enabled users to claim expenses and manage their allocated FBP.
- **Admin Portal:** Provided admins with tools to manage employees, their FBP allocations, and analyze consumption reports.
- **FBP CMS:** Streamlined operations by managing manual bill verification and customer queries.
